

QUICK PAIRING YOUR DRONE

CONNECT

Power on your Drone by holding the power button for 3 seconds.

Once the Drone lights are flashing, Turn on the Remote Control.

PAIRING

Move the left throttle/yaw stick to the maximum UP position then DOWN. You will hear two beeps.

Your Drone is now paired. Wait until the LED light at the bottom right corner is solid.

Press the Take-Off/Landing button once.

INDOOR FLYING / NON GPS MODE

Arm the drone by pushing the left and right joystick to the inner corners.

To take-off, increase the thrust by pushing the left stick to the UP position.
